

Petros Stefaneas
National Technical University
of Athens

The National Technical University (NTUA) is the oldest and most prestigious educational institution of Greece in the field of technology, and has contributed unceasingly to the country's scientific, technical and economic development since its foundation in 1836. NTUA participates actively or plays leading role in various open data initiatives for Greek Universities such as the Opencources and Openbooks National initiatives. It also participates into many EU funded or cofunded research or development projects in areas such as e-learning, e-government and e-culture.

NTUA will share the experience and knowledge related to the university-industry linkages and the evaluation of research impacts. The experts from the NTUA will participate in the preparation of materials and organize the seminars / workshops on digital libraries, semantic web technologies, digital scholarly communication, copyright, open access and open licenses. The NTUA experts will provide support and advice on the implementation of open science policies in Serbia.
