The following topics were discussed at the Meeting:

Prof. dr Snežana Smederevac informed the Project team members that the draft of the University bylaw on Open Science has been finalized and that it is to be adopted by the University Senate.

There was a meeting held with the rector of the University of Novi Sad where the functions and characteristics of the repository created in the frame of BE-OPEN Project were discussed, as well as its compatibility with the existing information systems. The rector considers the BE-OPEN repository as a central one and he has promised it is going to be sustainable.

It has been also decided that faculties and institutes should send the contacts of persons who would be in charge of administering the system. It is most likely that they will be librarians, however official nomination is required.

The director of the University Central library, Mirjana Brković, has prepared a draft of a guide for the use of the repository which is to be modified and prepared for librarians and researchers.

Following this, the details regarding the forthcoming trainings were discussed (topics of presentations, target groups, presentation dynamics).
