

WP1: Mapping of the Current Open Science Potentials at Serbian Universities

P.4: Required IT infrastructure

Essential: a strong ICT infrastructure and a stable internet connectivity

All Serbian universities will be provided with dedicated servers, network infrastructure, and database environments in order to secure permanent and reliable hosting of digital repositories.

The equipment will be adjusted to fit the performance and scalability demands depending on the number of university staff and the estimated number of users.

Due date: 15.02.2018.

Equipment to be purchased:

- 6 servers (servers for the repository platform infrastructure)
- 64 personal computers with operating system and MS office for the development and utilisation of the repository
- 3 printers
- 2 scanners
- 2 datacenter network switches
- 1 camera
- Software customisation for the repository platform
- Software for creating and editing PDF documents (18)
- Projector (with additional equipment), headphones

TOTAL VALUE OF PROCUREMENT: **257.593,24** EUR

Open call for bids announced: 22 September 2017

Deadline: 22 October 2017

Opening bids: 23 October 2017

by BE-OPEN Serbian partner institutions' appointed representatives.
