WP3 REVIEW OF DELIVERABLE:

B2 - National standards and guidelines for the development of web services, institutional repositories and databases enabling the implementation of open science principles

DELIVERABLE DETAILS

Title of the deliverable:	Platform for Open Science Adopted
Author(s) responsible for the deliverable:	N/A
WP leader:	University of Novi Sad
QAG reviewer(s):	Snezana Smederevac, Petros Stefaneas, Marina Lenisa, Caspar Addyman, Thed van Leeuwen
Short description of the deliverable:	
<p>The platform rests on fundamental principles of open science as defined by the European Commission¹, which are also incorporated in the Action Plan for the Implementation of the Strategy for Scientific and Technological Development of the Republic of Serbia in 2016-2020 - Research for Innovation. The platform is intended for all participants in scientific and research activity and it applies to the outputs of research projects and programmes funded fully or in part from the national budget of the Republic of Serbia, i.e. by the Ministry of Education, Science and Technological Development (hereinafter: The Ministry). Open science involves the realization of four goals: (1) an open-access approach to scholarly literature; (2) access to the data collected in scientific research; (3) the transparency of scholarly communication and methodologies, and (4) the development of a digital infrastructure that enables the achievement of these three goals. The realization of these goals should contribute to the greater visibility of research outputs and a stronger connection between science and economy, i.e. between science and society as a whole, as well as to the development of new research projects. The goals of open science are realized with full respect for ethical norms, copyright and intellectual property rights. Open science is principally achieved through (1) open access to scientific publications and (2) open access to primary data.</p>	

QUALITY ASSURANCE DETAILS

Assurance point:	Issues to be addressed:	Assessment:	Comments:	Recommendations:
1. Compliance with the objectives of BE-OPEN	Does the deliverable comply with the overall objectives of the project?	Deliverable complies with objective of the project	N/A	N/A
2. Compliance with the specific objectives of the work package	Does the deliverable comply with the WP Objectives as specified in the WP description?	Deliverable complies with WP objective specified in the WP description	N/A	N/A
3. Correspondence with the description of work of the relevant activity	Does the deliverable correspond with the activity description as specified in the Application Form?	Deliverable corresponds with the activity description as specified in the Application Form	N/A	N/A
4. Compliance with the deliverables format	Is the deliverable presented using the Project's deliverable format?	Deliverable is presented using the Project's deliverable format	N/A	N/A
5. Adequacy of complementary information	Examples of complementary info: <ul style="list-style-type: none"> • External sources used • Bibliography • List of contacts • Methodology used (i.e. for surveys) 	Deliverable Adequacy of complementary information complies with minimum information required	N/A	N/A
External sources and Bibliography used:				

<ul style="list-style-type: none"> N/A 				
6. Adequacy of written language	Level of written English	C2	N/A	N/A
Quality assurance:				
Overall assessment and suggestions for improvement		Overall assessment is that deliverable is completely in line with adequate quality expectations for the Report on the existing open science legislative and incentives		
Date of Quality Assurance performed by QAG reviewers:		01.04.2020.		
Deadline for submission of amended version of the Deliverable:		N/A
